

DWA_03.5 Knowledge Check_DWA3.2

1. User story(ies) in Gherkin syntax for the "+" button.

Feature: Increment tally count

As a user, I want to be able to increment the tally count so that I can keep track of counts accurately.

Scenario: User taps "+" button once

Given the app is open and the current tally is 0

When the user taps the "+" button

Then the tally count should increment to 1

Scenario: User taps the "+" button multiple times

Given the app is open and the current tally is 0

When the user taps the "+" button 5 times

Then the tally count should increment to 5

2. User story(ies) in Gherkin syntax for the "-" button.

Feature: Decrement tally count

As a user I want to be able to decrement the tally count so that I can adjust the count accurately when needed.

Scenario: User taps "-" button once

Given the app is open and the current tally is 5

When the user taps the "-" button

Then the tally count should increment to 4

Scenario: User taps the "-" button multiple times

Given the app is open and the current tally is 5

When the user taps the "-" button 3 times

Then the tally count should increment to 2

Scenario: User taps the "-" button when tally is at 0

Given the app is open and the current tally is 0
When the user taps the “ - ” button
The tally count should decrement to the negative numbers
